Creating a Pivot Table

Follow the steps below to create a Pivot Table that summarizes sales data:

- **Open Dataset**
 - Open the provided dataset in a new Excel worksheet
- **Select Data and insert Pivot Table**
 - Highlight the dataset, including headers, by clicking and dragging.
 - Go to the "Insert" tab in the Excel ribbon.
 - Click on the "PivotTable" button. The "Create PivotTable" dialog box will appear
- **Choose Data Source and Location**
 - Ensure the selected data range is correct in the "Table/Range" field.
 - Choose to place the Pivot Table in a new worksheet or an existing one.
- **Design Your Pivot Table**
 - In the Pivot Table Field List, select the "Model" field and choose the "Rows" area.
 - Select the "Sales" field and choose the "Values" area.
 - The Pivot Table will automatically sum the sales for each Model.
- **Format and Customize**
 - Right-click on the value cells in the Pivot Table and choose "Value Field Settings."

- Select "Sum" as the summarization function and set the custom name to "Total Sales."
- **Experiment and Analyze**
 - Try selecting different fields for the "Rows," "Columns," and "Values" areas to explore different summaries.
 - Experiment with filtering, sorting, and formatting options to customize your Pivot Table.
- **Refresh Data**
 - If you make changes to the dataset, right-click on the Pivot Table and choose "Refresh" to update the table.
